

Keeping everything shipshape

Given the need to reduce harmful nitrogen oxide emissions from diesel powerplants, you can have a clear conscience with our SCR platform system. Modular and maintenance-friendly, it guarantees precise and repeatable dosing of the reaction medium for this purpose. Internal communication between components via EDIP also makes application-specific settings an absolute breeze. The system is also compatible with Industry 4.0 applications.

Modular, compact and exceptionally efficient – our SCR platform system keeps everything shipshape.

We make ideas flow.
