

RELIABILITY HAS A NAME.

Whether you are maximizing uptime of your fleet, bringing a vessel back into service, or considering a new vessel, Cummins is a partner you can count on.

We are not just about engine technology. We are your partner in ensuring that your vessel is operating efficiently and cost-effectively, enabling you to reliably complete your mission and satisfy your customers.

Cummins has the most extensive service network in the world, ensuring fast access to reliable service, engineering expertise, and parts support when and where needed, even in the most remote operating locations.

Our world-class service and support network in more than 190 countries means that no matter the vessel or port, Cummins will keep your fleet Always On.

Nature of Business

Cummins understands that every job is critical to keep your business on track. That's why we offer a complete line of propulsion, generating set and auxiliary power solutions from 75-3132 kW, designed specifically for the challenges of commercial marine applications. Factory trained Marine Application Engineers will help you get the right spec for your vessel and Qualified Marine Technicians keep you up and running once in service. Our products are supported at every major port by an international distributor network with over 1,500 locations. Proven technology, reliability and durability. Every time.

Cummins Inc., a global power leader, is a corporation of complementary business units that design, manufacture, distribute and service engines and related technologies, including fuel systems, controls, air handling, filtration and emission solutions and electrical power generation systems. Headquartered in Columbus, Indiana (USA).

Cummins Sales and Service Singapore Pte Ltd is a wholly owned division of Cummins Inc. and the exclusive distributor for Cummins in Singapore. Our retail customer support center is located @ 85 Tuas South Avenue 1 and we share this site with the corporate Area Business office for South East Asia.

Our fully equipped service facility and company trained technicians can perform complete engine rebuilds, component repairs, Cummins fuel system repairs and engine dyno testing for the Cummins range of engine products. We maintain a complete inventory of genuine Cummins Parts, Cummins ReCon components, Fleetguard filtration and coolant products, Valvoline, Premium Blue, Premium Blue 2000 and Classic Blue lubricating oils.

Our proximity to the Parts Distribution Centre for South East Asia means we will usually be able to supply the parts required quickly. Our Sales team specialises in Marine applications, and we supply a full range of commercial and recreational propulsion engines and Marine Auxiliary power units. Of course, we can also supply engines from 55 to 4200 HP for all other applications.

Products and Service

Cummins manufactures products for heavy and medium duty trucks, buses, recreational vehicles, light commercial vehicles and for equipment in the construction, power generation, agricultural, mining, rail, marine and military markets.

Cummins Sales and Service Singapore Pte Ltd sells and supports the range of Cummins engines, and we have the capability to design power solutions to customer specifications. The local markets we currently serve include commercial and recreational marine, marine auxiliary power, construction and industrial applications, automotive bus and power generation.

We are fully equipped to provide field service support to all Cummins products in Singapore. Our workshop facilities include engine dynamometer, generator load banks, Cummins PT fuel system repair room, engine and component rebuild capability and exhaust emission-testing certification.

To support the sales and service of Cummins products, we have a large range of genuine Cummins parts and recon exchange items available through our Parts Department. We stock **Fleetguard filtration** and cooling system products and **Valvoline** lubrication products for all Cummins engines and most other manufacturers engine models.

Parts

Cummins Sales and Service Singapore Pte Ltd maintains a comprehensive genuine Cummins parts inventory at our Jurong facility. Our parts staff is trained to identify and supply the correct parts for your Cummins engine, and our proximity to the regional parts distribution center for South East Asia ensures that we are able to provide very fast delivery of most parts you will require.

Our parts department offers the following products:

- Genuine Cummins New and ReCon Parts for all Cummins engine models and in all applications.
- Genuine parts offer the reassurance of continued reliability from your engine.
- Factory remanufactured components provide the speed and convenience of component exchange combined with as new performance and excellent value.
- Premium quality Fleetguard filtration and coolant products to protect your Cummins investment.
- Nelson exhaust and air inlet system components to suit all Cummins engine products.
- Cummins endorsed lubricants specifically formulated to achieve the best possible life when used in Cummins engines.

Training

Engine technology changes so rapidly today that it is not easy for even the most efficient technician to keep up with the new technology. Couple this with the new engine platforms, and the need for continuing education becomes vital. Cummins Sales and Service Singapore Pte Ltd is dedicated to train its own personnel, dealers, fleet and end users at our Singapore Cummins Training Centre facility which is equipped with multimedia training equipment and well-equipped classroom facilities, including Cummins virtual College learning tools. We have a practical workshop and hands-on work which includes qualifications testing.

Our Training courses cover all current products used by our local and overseas customers and provide the skills necessary for diagnostics, maintenance and repair of Cummins products. All courses are conducted by a factory qualified instructor and the numbers of students are controlled to provide personalised attention to each student.
